Science

To know how the Digestive system works.

To know that humans have three main types of teeth:

1. Incisors: help you bite off and chew pieces of food;
2. Canines: These teeth are used for tearing and ripping food;
3. Molars: These help you crush and grind food .

To know that the food we eat has to be broken down into other substances that our bodies can use. This is called digestion.

To know that without digestion, we could not absorb food into our bodies and use it.

To know that digestion happens in the digestive system. This is a series of organs that break the food down so it can be absorbed into our bloodstream.
